DARK SPEED

DRIVER TECHNOLOGY

Designed by Aerospace Engineers, the Darkspeed Drivers feature dramatic improvements in aero shaping and internal and external technologies to deliver out of this world speed.

LARGER PWRSHELL H.O.T. FACE

A 10% larger PWRSHELL L-cup face maximizes launch and distance, while an A.I. designed H.O.T. Face delivers more efficient speed & spin across the clubface.

LOWER & MORE FORWARD PWR-BRIDGE

A lower and more forward positioning of the suspended PWR-BRIDGE weight unleashes even faster ball speeds.

CARBON CROWN AND SOLE

A lightweight carbon crown and sole piece replaces Titanium, allowing for better redistribution of weight to improve mass properties.

FASTER AERO SHAPING

An improved aero shape features a streamlined topline radius, a higher crown peak, raised skirt and reduced clubface surface area to maximize speed.

ENHANCED TRAJECTORY TUNING

The LS, X, and MAX models feature more adjustability options for a better ability to optimize spin & forgiveness.

DARK DRIVERS SPEED

The DARKSPEED drivers feature an improved aero shape, a larger PWRSHELL Face, and a lower and more forward PWR-BRIDGE to deliver more ball speed and distance. Three models (LS, X, and MAX) utilize specific weighting configurations to tailor performance for each player target.

The LS model features a Tour inspired shape for better players that demand low spin and low launch for maximum workability and control.

REFINED AERODYNAMIC DESIGN

An improved aero shape features a streamlined face to topline radius, a higher crown peak, raised skirt and reduced clubface surface area to maximize speed.

TOUR INSPIRED SHAPING

A refined clubhead shape features a reduced visual footprint at address that promotes workability and control.

LARGER PWRSHELL WITH A.I. DESIGNED H.O.T. FACE

A 10% larger PWRSHELL L-cup face creates more robust distance, while an A.I. designed H.O.T. Face delivers more efficient speed & spin across the clubface.

UNLOCK FASTER BALL SPEED

A lower and more forward positioning of the suspended PWR-BRIDGE weight unleashes even faster ball speeds.

MAX WORKABILITY WITH ADDED FORGIVENESS

Adjustable heel and toe weights are now complemented with a third back weight, allowing for additional adjustment to optimize spin & forgiveness.

The X model is designed for Tour and amateurs seeking a fast, low spin head that offers medium launch and plenty of forgiveness.

REFINED AERODYNAMIC DESIGN

An improved aero shape features a streamlined face to topline radius, a higher crown peak, raised skirt and reduced clubface surface area to maximize speed.

TOUR INSPIRED SHAPING

A refined clubhead shape features an elevated look at address that promotes workability and control with added forgiveness.

The MAX model delivers draw-bias and unrivaled stability in a low-mid spin design for ultimate distance and accuracy.

REFINED AERODYNAMIC DESIGN

An improved aero shape features a streamlined face to topline radius, a higher crown peak, raised skirt and reduced clubface surface area to maximize speed.

SHAPED FOR SPEED AND FORGIVENESS

A refined clubhead shape blends speed with forgiveness for an elevated look at address that inspires maximum confidence on the tee.

MORE ROBUST LAUNCH

A 10% larger PWR-SHELL L-cup face maximizes launch and distance, while an A.I. designed H.O.T. Face delivers more efficient speed & spin across the clubface.

UNLOCK FASTER BALL SPEED

A lower and more forward positioning of the suspended PWR-BRIDGE weight unleashes even faster ball speeds.

MAX FORGIVENESS & DRAW-BIASED CONTROL

Adjustable back and heel weight positions allow you to fine-tune draw bias in our most forgiving driver head.

SPIN

DARK SPEED

FAIRWAY TECHNOLOGY

The LS model is our first fairway featuring a Titanium construction, delivering driver-like performance, and significant distance gains compared to a traditional fairway design.

CARBON CROWN

A lightweight carbon crown replaces Titanium, allowing for better redistribution of weight to improve mass properties.

LARGER PWRSHELL H.O.T. FACE

An A.I. designed PWRSHELL H.O.T. Face features an optimized variable thickness pattern that delivers more efficient speed & spin across the clubface.

TUNGSTEN WEIGHTING

Internal tungsten weights are strategically positioned in the heel and toe areas to improve stability for tighter dispersion and pinpoint accuracy.

ENHANCED TRAJECTORY TUNING

In the LS model, adjustable heel and toe weights are now complemented with a third back weight, allowing for additional adjustment to optimize spin & forgiveness.

LOWER & MORE FORWARD PWR-BRIDGE

A lower and more forward positioning of the suspended PWR-BRIDGE weight unleashes even faster ball speeds.

The LS model features our first ever Titanium fairway construction for driver-like performance in a refined clubhead shape tailored for precise shot shaping.

TOUR INSPIRED SHAPING

Subdued clubhead styling inspires a Tour-validated look and feel at address.

TITANIUM CONSTRUCTION

A multi-material construction blends a lightweight 8-1-1 Titanium body and face, and a carbon crown to improve weight distribution for more distance.

TIGHTER DISPERSION WITH TUNGSTEN WEIGHTING

Internal and external tungsten weights are strategically positioned in the heel and toe areas to improve stability for tighter dispersion and pinpoint accuracy.

FASTER BALL SPEED

The PWR-SHELL insert and suspended PWR-BRIDGE design create a more flexible face and sole for penetrating launch and maximum ball speed.

SPEED & SPIN OPTIMIZATION

An A.I. designed H.O.T. Face features an optimized variable thickness pattern that delivers more efficient speed & spin across the clubface.

MAX WORKABILITY WITH ADDED FORGIVENESS

Adjustable heel and toe weights are now complemented with a third back weight, allowing for additional adjustment to optimize spin & forgiveness.

The DARKSPEED hybrid blends distance and high launch to provide more forgiveness on longer approach shots and adaptability across different lies.

CONFIDENCE INSPIRING SHAPE

A deep body design paired with a high bounce leading edge provides improved turf interaction and stability through any turf condition.

FASTER BALL SPEED

The PWR-SHELL insert and suspended PWR-BRIDGE design create a more flexible face and sole for penetrating launch and maximum ball speed.

SPEED & SPIN OPTIMIZATION

An A.I. designed H.O.T. Face features an optimized variable thickness pattern that delivers more efficient speed & spin across the clubface.

FORGIVENESS & HIGH LAUNCH

A 12g sole weight is positioned as low as possible to promote high, towering ball flights for maximum carry distance.

DARK SPEED

IRON TECHNOLOGY

Unlock your distance potential with an all new hollow construction that creates our longest and most robust iron design yet.

LARGER PWR SHELL H.O.T. FACE

A larger PWR SHELL L-cup face maximizes launch and distance, while an A.I. designed H.O.T. Face delivers more efficient speed & spin across the clubface.

SOFTER FOAM MICROSPHERES

The hollow cavity is filled with a softer 920D foam material that damps vibrations for improved sound and feel.

HOLLOW BODY CONSTRUCTION

A hollow metalwood construction creates a more unsupported face to maximize ball speed and distance.

PWR-BRIDGE WEIGHTING

A PWR-BRIDGE weight is suspended on a single post to encourage more body and face flexion for faster ball speed.

Unlock your distance potential with an all new hollow construction that creates our longest and most robust iron design yet.

POWERFUL BALL SPEED AND DISTANCE

A larger PWRSHELL insert and a refined PWR-BRIDGE weight create a more unsupported face for extreme flexibility and speed.

TUNED ACOUSTICS AND FEEL

The hollow cavity is filled with soft foam microspheres to deliver exceptional sound and feel.

EXTREME ACCURACY

An A.I. designed H.O.T. Face delivers more efficient speed and spin and produces a larger sweet spot for more looks at birdie.

KING[®]

IRONS

A 5-step forged construction, a compact tour cavity back shape, and a TPU insert deliver soft feel with excellent feedback that skilled players demand.

ELEGANT SHAPING

A compact address profile inspires precision and workability with a touch of forgiveness provided by the cavity back design.

5-STEP FORGED

Crafted and 5-step forged from 1025 carbon steel for exceptional feel and compact shaping

TPU INSERT FOR ENHANCED FEEL

A TPU insert behind the sweet spot creates a satisfying soft feel

ALUMINUM MEDALLION

An aluminum medallion enables better weight distribution for added forgiveness when you need it.

A highly versatile utility iron designed for skilled players that desire ultimate precision with a touch of forgiveness.

HOLLOW CONSTRUCTION

A hollow body is filled with a softer and lighter foam for added distance and improved feel.

TUNGSTEN WEIGHTING

A 61g tungsten weight keeps CG low to reduce spin for longer total distance.

FORGED PWRSHELL FACE

A forged PWRSHELL Face offers more flexibility than a traditional face insert, creating elastic rebound for faster ball speed and higher launch.

H.O.T. FACE TECHNOLOGY

H.O.T. Face Technology uses artificial intelligence to design a variable thickness pattern that delivers more efficient speed and spin across the face.

The KING TEC Hybrid features a refined shape, H.O.T. Face Technology, and adjustable weighting and loft to deliver ultimate versatility in a better player hybrid.

H.O.T. FACE TECHNOLOGY

A H.O.T. Face design uses artificial intelligence to create a variable thickness pattern that delivers more efficient speed and spin across the face.

PWRSHELL FACE DESIGN

A forged PWRSHELL face insert delivers more flexibility across a larger area of the face for faster ball speed and higher launch.

LIGHTWEIGHT CARBON CROWN

A carbon crown allows more discretionary weight to be positioned within the clubhead to enhance speed and forgiveness.

ADJUSTABLE WEIGHTING SYSTEM

Two 12g heavy weights can be positioned in the toe, heel and front to fine tune trajectory and spin performance. Heavier 14g and lighter 10g weights are available in custom to allow for +4g and -4g in weight adjustment.

A new face milling pattern and SNAKEBITE grooves maximize spin control in both dry and wet conditions.

Free Arccos sensors with purchase

SNAKEBITE GROOVE TECHNOLOGY

An ultra precise CNC milled groove uses sharper edges and a larger groove volume to deliver maximum spin.

UPDATED FACE MILLING PATTERN

A new face milling pattern produces 50% more spin in wet conditions than the previous generation wedge.

FULL FACE GROOVES (56, 58, 60)

Full face grooves on the 56, 58, and 60 degree lofts provides maximum spin performance on shots with an open face.

3 GRINDS: VERSATILE, CLASSIC, WIDELOW

The "versatile" grind features toe, heel and trailing edge relief, the "classic" grind features a progressive sole width from heel to toe, and the "widelow" grind features a wide sole with reduced bounce.

PROGRESSIVE NOTCH DESIGN

A notch design enhances versatility by enabling the leading edge to sit flush with the turf on open shots. The notch is center-aligned on the 48-56 degree lofts and more heelward on the 58-60 degree lofts.

DR AW

LIGHTER. FASTER. EASIER.

AIR-X is our lightest weight product line suited for players with smoother swing tempos. A lightweight design enables easier speed creation to produce as much distance as possible, regardless of your age, strength, and swing mechanics.

Featuring a lightweight construction, and an all new H.O.T. Face insert, the AIR-X driver is designed to help golfers with smooth tempos generate increased club speed and distance.

LIGHTWEIGHT DESIGN

The combination of a lighter head, shaft, and grip encourages faster club speed.

H.O.T. FACE TECHNOLOGY

An A.I. designed variable thickness pattern increases forgiveness across the face.

DRAW-BIASED WEIGHTING

Weight is concentrated in the heel area to promote a draw-biased ball flight.

OFFSET DESIGN

An offset design provides maximum slice correction for a straighter ball flight.

AVAILABLE IN STRAIGHT NECK

A straight neck offering with no offset is available to those that prefer a traditional setup.

Featuring a lightweight construction, and an all new H.O.T. Face insert, the AIR-X women's irons are designed to help golfers with smooth tempos generate increased club speed and distance.

LIGHTWEIGHT DESIGN

The combination of a lighter head, shaft, and grip encourages faster club speed.

H.O.T. FACE TECHNOLOGY

An A.I. designed variable thickness pattern increases forgiveness across the face.

DRAW-BIASED WEIGHTING

Weight is concentrated in the heel area to promote a draw-biased ball flight.

OFFSET DESIGN

An offset design provides maximum slice correction for a straighter ball flight.

The T-Rail combo set features a traditional hybrid shape blended with 6 hybrid-irons. The unique setup enables golfers to enjoy immediate improvement in launch, distance and consistency without having to make any adjustments to their swing.

H.O.T. FACE TECHNOLOGY

H.O.T. Face Technology uses artificial intelligence to design a variable thickness pattern that delivers more efficient speed and spin across the face.

BAFFLER RAILS

Baffle Rails allow the club to glide effortlessly through any turf condition, making a great shot outcome always possible.

HOLLOW CONSTRUCTION

A hollow design through the set gives every club the super power of hybrid-like launch and distance.

4 HYBRID IN THE SET

A 4-hybrid launches higher and is more forgiving than a 4-iron, making longer approach shots not just easier, but much more consistent.

COBRA PUTTERS

3D PRINTED

The COBRA 3D PRINTED line is constructed for those seeking ultimate stability. Featuring high MOI designs that consist of three shapes: oversized blade (GRANDSPORT), oversized fang (SUPERNOVA) and our showcase mallet design (AGERA). Each model is available with select hosel configurations to fit your ideal stroke type. When next level stability is packaged with LA GOLF DESCENDING LOFT TECHNOLOGY, you will get launch consistency from stroke to stroke, with unparalleled end-over-end roll performance in the game.

LA GOLF DESCENDING LOFT TECHNOLOGY

COBRA has licensed LA GOLF's patented DESCENDING LOFT TECHNOLOGY. Features four surface planes (4°, 3°, 2°, 1°) that mitigate the delofting or the addition of loft during head delivery at impact and provides consistent launch from putt-to-putt.

Vintage

The COBRA VINTAGE family blends classic designs with modern performance. Four classic shapes ranging from a blade (SPORT), an oversize blade (WIDESPOT), fang (NOVA) and oversized mallets (STINGRAY & CUDA) are created from a piece of MIM'd 304SS. A MIM construction delivers more consistency and accuracy while highlighting milled surfaces for enhanced appeal. Each putter features a new PEBAX insert that gives a soft and responsive feel while delivering unmatched roll performance with LA GOLF DESCENDING LOFT TECHNOLOGY.

PEBAX – THERMOPLASTIC ELASTOMER INSERT

For a softer, responsive feel

MIM 304 SS METAL

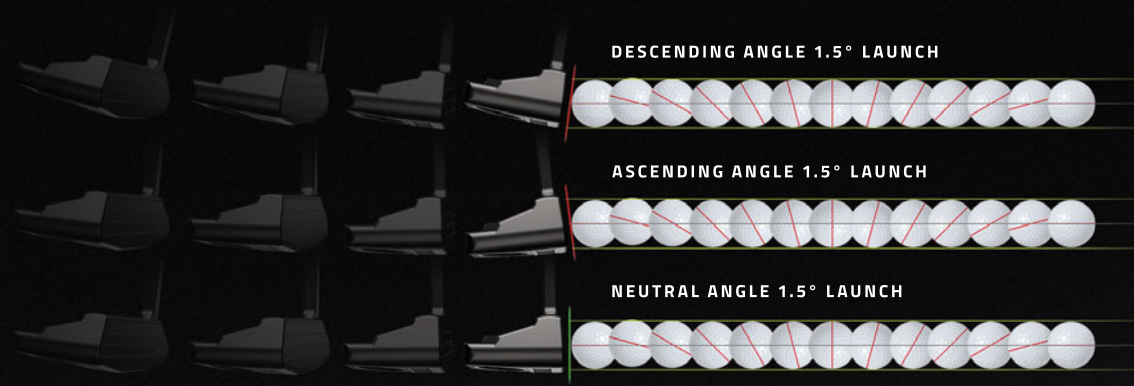

Precision with milled detail for premium look

ADJUSTABLE WEIGHTING SYSTEM

Interchangeable weights to fine tune head weight and feel

TRUER AND MORE CONSISTENT ROLL

DLT™ is designed to produce a consistent 1.5 degree launch angle regardless of how much shaft lean, attack angle, and whether the ball comes in contact on the higher or lower portion of the face.

The COBRA GRANDSPORT-35 putter is a multi-material 3D printed construction that brings ultimate stability in a blade. Featuring a plumbers neck hosel, designed for players with a moderate arc stroke type. Paired with LA GOLF's Descending Loft Technology that delivers consistent launch and unmatched end-over-end roll performance in the market.

MULTI-MATERIAL CONSTRUCTION

An oversize blade shape combines a 3D printed nylon lattice cartridge-4g, a 304 stainless steel MIM frame-302g and a 3g carbon fiber crown that creates the ultimate design for stability.

3D PRINTED NYLON CARTRIDGE

An intricate 3D printed nylon lattice cartridge optimizes weight savings allowing CG to sit low and forward to optimize energy transfer and stability.

LA GOLF'S DESCENDING LOFT TECHNOLOGY

Featuring a 6061-aerospace grade aluminum insert with LA GOLF's proprietary Descending Loft Technology, utilizes 4 descending lofts (4°, 3°, 2°, 1°) to mitigate delofting and the addition of loft through head delivery during impact and provides an optimal launch for unparalleled end-over-end roll performance.

ADJUSTABLE WEIGHTING SYSTEM

Adjustable weighting system gives the player the ability to interchange to a lighter or heavier weight to achieve a personal feel. All putters ship stock with nominal 15g weights and can move +/- 5-10g in either direction. Additional weights sold separately. (5g, 10g, 15g, 20g, 25g)

Free Arccos sensors with purchase

The COBRA GRANDSPORT-Armlock putter is a multi-material 3D printed construction that brings ultimate stability in a blade. Featuring a plumbers neck hosel, designed for players with a moderate arc stroke type and seeking a longer armlock shaft setup. Paired with LA GOLF's Descending Loft Face Technology that delivers consistent launch and unmatched end-over-end roll performance in the market.

ARMLOCK DESIGN

An armlock setup increases consistency by eliminating any variations in shaft angle through the putting stroke. A longer length and an oversize grip allows the user to rest the grip and shaft against their lead forearm for maximum stability.

MULTI-MATERIAL CONSTRUCTION

An oversize blade shape combines a 3D printed nylon lattice cartridge-4g, a 304 stainless steel MIM frame-302g and a 3g carbon fiber crown that creates the ultimate design for stability.

The COBRA NOVA putter blends classic shaping with modern performance in a fang design. Featuring a single bend shaft, designed for players with a straighter stroke type. Paired with LA GOLF's Descending Loft Face Technology that delivers consistent launch and unmatched end-over-end roll performance in the market.

CLASSIC FANG SHAPE

A fang shape is MIM'd from 304 stainless steel and features a triple sightline that frames up the golf ball for enhanced alignment at address.

SOFT PEBAX INSERT

Pebax is a high-performance thermoplastic elastomer (TPE) that offers an exceptional soft and responsive feel. Featuring LA GOLF's proprietary Descending Loft Technology, utilizes 4 descending lofts (4°, 3°, 2°, 1°) to mitigate delofting and the addition of loft through head delivery during the stroke and provides an optimal launch for unparalleled end-over-end roll performance.

ADJUSTABLE WEIGHTING SYSTEM

Adjustable weighting system gives the player the ability to interchange to a lighter or heavier weight to achieve a personal feel. All putters ship stock with nominal 15g weights and can move +- 5-10g in either direction. Additional weights sold separately. (5g, 10g, 15g, 20g, 25g)

COMPLETE SETS

MEN'S SET

The AIR-X set features a 12-piece set of the same AIR-X clubs that are sold as separates with the exception of a non-PVD sole. Each club features a lightweight construction, and an all new H.O.T. Face insert, designed to help golfers with smooth tempos generate increased club speed and distance. The set also comes equipped with a premium blade putter, cart bag, and headcovers.

AIR-X DRIVER

An offset driver features a lightweight construction, and a new H.O.T. Face design, delivering the best combination of speed and forgiveness.

AIR-X FAIRWAY

A 3-wood features a shallow profile, an offset design, and heel biased weighting for easy launch and accuracy.

AIR-X HYBRIDS

A 4 and 5 hybrid with an offset design and heel-biased weighting make longer approach shots easier and more accurate than ever.

AIR-X IRONS

Low profile irons with greater lofts and perimeter weighting launch high and straight for more GIR's and birdie opportunities.

BLADE PUTTER

A premium blade putter design features a machined face for exceptional feel and control on long and short putts.

PREMIUM CART BAG

To tie the set together, a premium bag features a 14-way top, 9 zippered compartments, and a large insulated beverage cooler.
